## Summary

\*\*\* I will never stop working on the project until the client will be statisfied through my result.  
\*\*\*

The things what I give the deliverable result to the client:

- Write clean, high-quality, high-performance, maintainable code
- Discover and fix programming bugs
- Support test and deployment of new products and features
- Revise, edit, proofread & optimize web content
- Analyze and maintain existing software applications
- Test software development methodology in an agile environment
- Work with cross-functionally to enhance overall user experience of our platforms
- Own various design tasks involved in the web development life cycle from start to finish
- Coordinate cross-functionally to ensure project meets business objectives and compliance standards
- Collaborate cross-functionally with business users, project managers and other engineers to achieve elegant solutions

The skills what I have experienced:

- React.js/NextJS/Gatsby/Material-UI
- Vue.js/NuxtJS/Vuetify
- GraphQL/Rest API
- NodeJS
- PHP/Laravel
- Python/Django
- Solidity/Smart Contract/Web3.JS
- TailwindCSS/HTML/HTML 5/CSS3/Bootstrap
- Javascript/JQuery
- MySQL/MongoDB
- Docker
- AWS/Google Cloud
- Figma/Zeplin/Invision
- Git

I'm familiar with agile workflow tools including Slack, JIRA, Trello, Bitbucket, Github, Gitlab, etc.

I ensure the highest quality of product and 100% satisfaction through my work and I can stick to your timezone during work.
